Fix option parsing for gravatars #1034

In addition to that:

* the default size was 50px in the old lib, this has been restored

* some tests to test the default and option parsing

2012-06-10 08:34 pm - Felix Schäfer

Restore the default class for gravatars #1034

History

2012-06-10 01:18 am - Alf Gaida

Gravatars have the Size 80 x 80 on every place they are displayed. Not so nice. Bevore update the generated html-source looks like this:

<pre>
<div class="profile-wrap">
<img class="gravatar" width="40" height="40"
src="http://www.gravatar.com/avatar/16aecbc5187a0c9972ced6fb12115221?rating=PG&size=40&default=" title="" alt="">
</div>

</pre>

After update to 3.2 the generated source look like this

<pre>
<div class="profile-wrap">
<img width="80" height="80" src="http://gravatar.com/avatar/3c1ac82f653e17d27e4774dac9b3a9b2.jpg" size="40" default="" alt="">
</div>
</pre>

It looks, like class and size are lost with the gem-update

2012-06-10 07:56 pm - Felix Schäfer

- Target version set to 3.2.1

- Status changed from Open to Ready for review

That was my fault, I got the options parsing a little off, sorry.

Pull request at https://github.com/chiliproject/chiliproject/pull/207

2012-06-10 08:05 pm - Holger Just

- Status changed from Ready for review to Closed

- Affected version set to 3.2.0

- Assignee set to Felix Schäfer

Pulled it in with commit:5ef63ec. Thanks.
