ChiliProject - Bug # 537: Accessing version of newly created WikiContent results in NoMethodError

Status:	Closed	**Priority:**	Normal
Author:	Gregor Schmidt	**Category:**	Wikis
Created:	2011-07-25	**Assignee:**	Holger Just
Updated:	2011-07-25	**Due date:**	

Remote issue URL:	
Affected version:	2.0.0
Description:	When executing the following code, I'm getting @0@ in Chili 1.x while I get an error in Chili 2.0:

WikiContent.new.version

The error output looks like the following

<pre>
NoMethodError: You have a nil object when you didn't expect it!
You might have expected an instance of ActiveRecord::Base.
The error occurred while evaluating nil.update_attribute
 from app/models/wiki_content.rb:65:in `version'
 from (irb):2
</pre>

The code creates an initial journal - which involves a db update - which seems to be wrong since I did not save anything up to this point. I think, the @version@ method should simply return @0@ for new records.

A pull request including a new test is attached.
