

ChiliProject - Feature # 1002: Setting for "Show date instead of Age on journal"

Status:	Open	Priority:	Normal
Author:	Alim Özdemir	Category:	User interface
Created:	2012-04-27	Assignee:	
Updated:	2012-04-27	Due date:	
Remote issue URL:			
Affected version:			
Description:	In issues there's always the "Updated x UNIT ago" . It is sometimes cumbersome to use the mouse and read the tooltip to see, when it was exactly (e.g. "one year ago"). A setting (maybe per user in "My page") to choose between * age * date + time * date + time (age) * age (date + time) * ... may be helpful.
