

## ChiliProject - Feature # 104: Add email header for the type of message

<b>Status:</b>	Closed	<b>Priority:</b>	Normal
<b>Author:</b>	Eric Davis	<b>Category:</b>	Mail Sending
<b>Created:</b>	2011-01-22	<b>Assignee:</b>	Felix Schäfer
<b>Updated:</b>	2011-02-11	<b>Due date:</b>	
<b>Remote issue URL:</b>			
<b>Affected version:</b>			
<b>Description:</b>	If there was a mail header for the type of message, it would make it easier to filter emails. Example:		
	* X-ChiliProject-Type: Issue		
	* X-ChiliProject-Type: Forum		
	* X-ChiliProject-Type: Wiki		
	* X-ChiliProject-Type: User		

### Associated revisions

Add Type headers to outgoing emails. #104

### History

**2011-01-23 12:21 am - Felix Schäfer**

The @Message-Id@ already has the object name in it in many cases, thus it's already possible, if not easy/convenient.

**2011-01-24 08:57 pm - Eric Davis**

True but it will be hard to parse out in standard mail clients. My Rackspace email allows exact matches only.

**2011-01-24 09:01 pm - Holger Just**

There are special headers for most (if not all) object types:

- \* X-Redmine-Issue-Id
- \* X-Redmine-Wiki-Page-Id
- \* X-Redmine-Topic-Id

You could filter for the existence of these headers.

Is this feature going to be related to

<http://www.redmine.org/issues/1616>

Both issues are not related: this issue is about adding additional headers to outgoing mail, the issue you reference is about incoming mails.

hi,

I'm freshly new on chiliproject website (2 hours ago \o/) and I began to add header on some mailer methods.

I used redmine\_headers method available in the mailer model like these examples:

```
* redmine_headers 'Type' => 'Issue'  
* redmine_headers 'Type' => 'Forum'  
* redmine_headers 'Type' => 'Wiki'  
* redmine_headers 'Type' => 'User'
```

If you have any ideas or advices, tell me them ! :)

Thx !

Ok, I've added them in <https://github.com/thegcat/chiliproject/commit/f35a9112eb97827745f753b04220035f7f48adaf>

I haven't found any headers tested, so nothing on the testing side. I'll pull it in if I get an OK either from Eric or Holger.

Felix: looks good to me. Go ahead and pull it into the official master with @git merge --no-ff@.
