

ChiliProject - Feature # 1046: Enable use of the "<<me>>" operator when querying custom fields

Status:	Closed	Priority:	Normal
Author:	Kirpal Sukumar	Category:	Custom Fields
Created:	2012-06-18	Assignee:	Felix Schäfer
Updated:	2012-06-20	Due date:	
Remote issue URL:			
Affected version:			
Description: When creating a custom query on the Assignee field, the "<<me>>" operator is available, allowing creating of a generic global query for any issues assigned to the user. This functionality is currently unavailable when querying on custom fields populated by user list. Please extend the option of using this operator to custom fields.

You can almost copy-paste, I think, from a recent Redmine "commit":<http://www.redmine.org/projects/redmine/repository/revisions/8638>

2012-06-20 01:04 pm - Felix Schäfer

I've seen that one and tried to apply it, sadly it's not directly compatible, it will need some work to apply cleanly.
