Description: We want to switch von redmine (1.4-stable) nach chiliproject "stable"
fresh clone from git

In ./db/migrate//20100714111653_build_initial_journals_for_acts_as_journalized.rb:45:in
'up_without_benchmarks'
there is called some functions in app/models/changeset.rb

In app/models/changeset.rb in commiter is used "repository.repo_log_encoding"
BUT this is not yet existent on our repos.
So better use the workaround function 10 lines above

FIX
