

ChiliProject - Bug # 1075: Can no longer render unordered lists within ordered lists

| | | | |
|--------------------------|---|------------------|-----------------|
| Status: | Closed | Priority: | Normal |
| Author: | Colan Schwartz | Category: | Text formatting |
| Created: | 2012-07-10 | Assignee: | Felix Schäfer |
| Updated: | 2012-07-13 | Due date: | |
| Remote issue URL: | | | |
| Affected version: | 3.2.2 | | |
| Description: | This worked fine in 1.x: <pre><pre> # foo ** bar </pre> It should display: <pre> 1. foo â€¢ bar </pre> ...but instead I see: <pre> 1. foo 1. bar </pre> Here's a test whose results should be visible. (This isn't in PRE tags.): # foo ** bar</pre> | | |

- Target version set to 3.3.0

Okay, this is purely a CSS problem. The HTML is still rendered correctly as

```
<pre>
<ol>
<li>
foo
<ul>
<li>bar</li>
</ul>
</li>
```

</pre>
