

ChiliProject - Feature # 1076: Update jQuery libraries to their latest version

Status:	Closed	Priority:	Normal
Author:	Andrew Smith	Category:	Libraries
Created:	2012-07-11	Assignee:	Andrew Smith
Updated:	2012-07-11	Due date:	
Remote issue URL:			
Affected version:			
Description: Using the Google CDN speeds up downloads and if a user has already visited a site that uses the same JS lib they will already have it cached. If the CDN isn't available then use a fallback to a local version			
This basically copies what HTML5 Boilerplate does

- Subject changed from Update jQuery libraries to their latest version and use Google CDN to Update jQuery libraries to their latest version

This issues got demoted to only upgrade the JQuery and JQuery UI libraries.

To cite from my comments on the pull request:

Unfortunately, we can't use the Google CDN (or any non-optional external data sources for that matter).

- * People use Chili in environments where users don't have full internet access, thus can't access the Google CDN.
- * We can't properly use the Assets pipeline with external assets.
- * I'm uneasy sharing information about internal project management tools with Google (via Referrers, ...)
