Affected version:	
Description:	https://www.chiliproject.org/boards/1/topics/1973?r=1997#message-1997
	Chili Fan wrote:
	*i created several users for test purpose and use "manual account activation" vs "Account activation by email" when use last one,
	the notice message to user could be improved by +add Text+ to mention "an activation email has been send to your mailbox"*
	Could you open a feature request for it?

New Topic: Email Possible Improvements to inform users

+Possible Improve01+

Possible improve maybe even better to always send *User account* information if it's box is checked and user input fields are valid

and save button is pressed my point of view otherwise uncheck send... box

+Possible Improve02+

Possible improve add login field data to the *User account* information message content

+Possible Improve03+

Leave the way of triggers to send *+Activation+* information when perform register or manual accout create

but Possible to improve to send *User account* information to user once the account has been activated

Thanks
