

ChiliProject - Feature # 1104: Add field changes to issue update previews

Status:	Open	Priority:	Normal
Author:	Colan Schwartz	Category:	User interface
Created:	2012-07-31	Assignee:	
Updated:	2013-03-18	Due date:	
Remote issue URL:			
Affected version:	3.3.0		
Description:	So that one can see what is about to be changed, it would be great if changes to fields would show up in issue update previews. For example, if I changed the Assignee from "James Kirk" to "Jean-Luc Picard" and the Status from "Assigned" to "To be tested", something like this should show up in the preview before the update: *Assignee: James Kirk > Jean-Luc Picard* *Status: Assigned > To be tested* _Update here_		

History

2013-03-18 03:30 pm - Colan Schwartz

As I don't have permission to add anything to the "Remote issue URL" field, I'll post it here:
