

## ChiliProject - Bug # 1145: Some Icon Paths are Hardwired

<b>Status:</b>	Open	<b>Priority:</b>	Normal
<b>Author:</b>	Gordon Anderson	<b>Category:</b>	
<b>Created:</b>	2012-09-15	<b>Assignee:</b>	
<b>Updated:</b>	2012-09-15	<b>Due date:</b>	
<b>Remote issue URL:</b>			
<b>Affected version:</b>			
<b>Description:</b>			
I've been trying to replace the icons using images in a Chiliproject theme and got reasonably far. However some of the editing screens do not use the .icon and .icon-thing css classes, but instead code of the form <code>@&lt;img alt="Toggle_check" src="/images/toggle_check.png?1347609821"&gt;</code> @ It would be good if this was consistent throughout Chiliproject so the icons can be overridden without resorting to hacking the core code.			
Places where I see this problem are as follows:			
http://localhost:3000/users (Administrator column)			
http://localhost:3000/roles (sort column)			
http://localhost:3000/trackers (sort column)			
http://localhost:3000/issue_statuses (Default Value, Issue Closed, Sort)			
http://localhost:3000/enumerations (Default Value, Active, untitled Sort)			
http://localhost:3000/admin/info (this actually uses a different image for the tick)
