ChiliProject - Bug # 1159: Calendar first day of the week does not respect application settings

Status:	Needs more information	**Priority:**	Normal
Author:	Tom Rochette	**Category:**	
Created:	2012-10-02	**Assignee:**	
Updated:	2012-12-10	**Due date:**	

Remote issue URL:	
Affected version:	3.3.0
Description:	The HTML5 calendar of Chrome 22 doesn't start with the day listed in the application settings. So if I set it to start on Sunday for instance, the calendar still shows up as starting on Monday.
	Repro:
	# Set calendar to start on Sunday
	# Create a new issue and pick a start/due date, notice that the calendar week doesn't start with Sunday
	Expected:
	# Calendar starts week on Sunday

It seems the "date input type":http://dev.w3.org/html5/spec/single-page.html#date-state-(type=date) used for this doesn't allow to set a start-of-week day, so I guess the browser shows the calendar wrt the language you are using the browser in. If this is not the case for Chrome I'd say it's a bug on their side.

Andrew, what do you think?
