| **Description:** | Received my CC stick last week.  Unpacked and loaded image to SD Card.  Plugged into prescribed power source (500mA), hooked everything up and nothing.  I noticed that the LED was not lit.  Hooked my cell phone up to the power source to ensure that it was working properly.  It was.  Plugged back into the stick and nothing.  No light.  However, I did notice that the stick felt warm to the touch.  Please advise.  Device ID #: cd0c0b16493d4dd39a5a776348bf7dcc |
