ChiliProject - Bug # 1171: Git repositories can't be updated in repository view.

Status:	Closed	**Priority:**	High
Author:	Nye Bill	**Category:**	
Created:	2012-10-25	**Assignee:**	
Updated:	2012-10-25	**Due date:**	

Remote issue URL:	
Affected version:	3.3.0
Description:	I installed chiliproject 3.3.0 and redmine_git_hosting by kubitron on the system with ruby 1.9.3, and I use pg as the database adapter. The git version is 1.7.4.4 postgresql version is 9.1.4
	autofetch is on, but when I visit repository page of a project, I can't see new commits. I even ran "rake redmine:fetch_changesets RAILS_ENV=production". But I still can't see new commits on chiliproject. I can see new commits on gitweb.
	How can I make chiliproject update repository commits?

- Status changed from Open to Closed

It turns out to be redmine_git_hosting that caused this issue.

Thus, I'm closing it.
