

## ChiliProject - Feature # 122: User journal

<b>Status:</b>	Open	<b>Priority:</b>	Normal
<b>Author:</b>	Andrea Campi	<b>Category:</b>	
<b>Created:</b>	2011-02-02	<b>Assignee:</b>	
<b>Updated:</b>	2011-02-03	<b>Due date:</b>	
<b>Remote issue URL:</b>			
<b>Affected version:</b>			
<b>Description:</b>	Track interesting events such as joining/leaving a project, changes in rights etc. This is mostly useful in connection with issue #121 to track unauthorized activity. It may make sense to restrict reading this journal to a subset of users.		

### History

This will be rather easy once we have merged the generic facility for having journals on every object. See #123 for that.

#### 2011-02-03 12:59 am - Eric Davis

Or to look at it another way as a "Project journal"

- \* User A added
- \* User B given RoleZ
- \* Homepage set to "https://www.chiliproject.org"

We are using a wiki page to handle this for the ChiliProject infrastructure (e.g. server changes, /admin changes). It works but is really messy.
