

ChiliProject - Bug # 1223: reposman.rb fails after update from v3.3.0 to 3.6.0

Status:	Closed	Priority:	Normal
Author:	Jan F Westerkamp	Category:	
Created:	2013-02-03	Assignee:	
Updated:	2013-03-19	Due date:	
Remote issue URL:			
Affected version:	3.6.0		
Description:	After upgrading from version 3.3.0 to 3.6.0 my cronjob calling reposman.rb fails. Same thing calling it manually from the command line. <pre>/opt/chiliproject/extra/svn/reposman.rb --redmine mychili.url --svn-dir /repos --owner www-data --group root --url file:///repos --key='abcd'</pre> Unable to connect to http://mychili.url/sys/: Disallowed type attribute: "yaml" Chiliproject is running on debian squeeze, with ruby 1.8.7 (2010-08-16 patchlevel 302) Might this be related to http://techttime.getharvest.com/blog/activeresource-xml-bug-fix-for-rails-3-dot-0-19 and not a bug in chiliproject?

Adds attachments upload on wiki edit form (#1223).

git-svn-id: svn+ssh://rubyforge.org/var/svn/redmine/trunk@3500 e93f8b46-1217-0410-a6f0-8f06a7374b81

History

2013-02-16 10:11 am - Jan F Westerkamp

- Target version set to 3.8.0

2013-02-20 09:33 pm - Holger Just

- Status changed from Open to Needs more information

Can you please check if this is still an issue on ChiliProject 3.7.0? From my tests, the Rails update should have fixed this issue.

2013-02-21 07:50 am - Jan F Westerkamp

My three installations still show the same error with rails 2.3.17 and ChiliProject version 3.7.0.63976e652 (MySQL)

2013-02-21 12:44 pm - Holger Just

I'm sorry, I still can't reproduce it. Could you please check if you have any custom plugins installed which are not part of ChiliProject core? If so, please temporarily remove them and check if the issue persists.

2013-02-21 12:49 pm - Holger Just

As a side-remark: the current-until-10-minutes-ago version of my redmine_checkout plugin provoked exactly this behaviour. Thanks to Jens Ulferts, this should be fixed in the current master.

2013-02-21 01:41 pm - Jan F Westerkamp

Actually, I am using your redmine_checkout plugin in all my installations. I'll post the results once I'm done testing.

- *Status changed from Needs more information to Closed*

Removing the redmine_checkout plugin does solve the problem. Looking forward to the next release of redmine_checkout ;-)

2013-02-21 06:10 pm - Holger Just

I honestly don't know when a new release is coming, but you could try the "current master": https://github.com/meineerde/redmine_checkout of the plugin which solve the issue.

2013-02-21 07:07 pm - Jan F Westerkamp

Thanks for your help and the updated plugin, which is now up and running again.

2013-03-19 09:55 pm - Felix Schäfer

- *Target version deleted (3.8.0)*

Pulling out of 3.8.0 as it wasn't a problem with ChiliProject proper.
