ChiliProject - Bug # 1244: rake db:migrate

Status:	Needs more information	Priority:	Normal
Author:	ken bartlett	Category:	
Created:	2013-02-24	Assignee:	
Updated:	2013-03-13	Due date:	

Remote issue URL:	
Affected version:	
Description:	I am getting this error when trying to run rake db:migrate. I have followed all instructions up to this point. thanks!
	C:\Sites\project1>bundle exec rake db:migrate
	rake aborted!
	Expected C:/Sites/project1/vendor/plugins/rfpdf/lib/rfpdf.rb to define RFPDF
	C:/Sites/project1/vendor/plugins/rfpdf/init.rb:11:in `block in evaluate_init_rb'
	C:/Sites/project1/vendor/plugins/engines/lib/engines/plugin.rb:45:in `load'
	C:/Sites/project1/config/environment.rb:42:in `<top (required)>'
	Tasks: TOP => db:migrate => environment
	(See full trace by running task with --trace)

It seems that the (Redmine?) plugin "rfpdf" isn't compatible with ChiliProject.

Sadly many (old) Redmine plugins aren't compatible to 3.x versions of CP any more.
So you have to use an 2.x version of CP or to search other comparable plugins or somebody who can fix it four you (open a new issue ticket).

What happens when you move rfpdf out of the plugins directory?

Hi!

I'm not a CP dev (just C++ dev, currently learning Ruby) so excuse my misaking.

As dev you know Felix+Holger need some more infos about your environment:

* Trace log

* which OS, Ruby version, Rails version?

* how is it started (via IIS/Apache or as standalone)?

* was ChiliProject already running on your system or is it a first installation?

Thanks in advance!

Candy: This is your last warning. If you vandalize any of the tickets here one more time, I'm going to lock your account. This is not a test installation.
