### 2013-03-15 03:31 pm - Holger Just

It looks like you used your ChiliProject database previously on Ruby 1.8 and moved to 1.9 now. Ruby 1.9 brings a new YAML engine (Psych instead of Syck). As Syck unfortunately sometimes produced YAML which is technically against the standard and subsequently isn't parseable by Psych, you get the error during parsing of journal changes (which are saved in YAML in the database).

As a temporary workaround, you could try to force Syck as a YAML engine which will probably remove the immediate error. You can do this by creating a new file in `@config/initializers/force_syck.rb@` containing this code:

```
<pre>
require 'yaml'
YAML::ENGINE.yamler = 'syck'
</pre>
```

In the long term, we will have to come up with a technique to transform the "old" yaml to be compliant and parsable by Psych. Probably something along the lines of <http://darwinweb.net/articles/convert-syck-to-psych-yaml-format> in a migration...
