Updated:	2013-07-17	**Due date:**	

Remote issue URL:

Affected version:

Description: The current liquid gem version referenced in the Gemfile (liquid 2.3.0) has some syntax errors in rubinius 1.9 mode (see https://travis-ci.org/chiliproject/chiliproject/jobs/9136029#L168).

Liquid 2.4.0 probably solves that, but maybe we can move to @~>2.4@ to pin it to the major instead of to a minor revision. The current version (2.5.0) doesn't have the syntax error.
