Remote issue URL:	
Affected version:	
Description:	Need to migrate perl library in file Redmine.pm, stored in /extra/svn folder.
	For calling the ne library you need to replace Digest::SHA1 by Digest::SHA. backward compatibility should be respected.
	Package libdigest-sha1-perl have been removed from debian repository. It has been replaced by libdigest-sha-perl.
	http://packages.qa.debian.org/libd/libdigest-sha1-perl.html
	Thus this documentation is obselete for the moment: https://www.chiliproject.org/projects/chiliproject/wiki/HowTo_configure_ChiliProject_for_advanced_git_integration
