

ChiliProject - Feature # 1353: Add environment info display to /admin/info.

Status:	Ready for review	Priority:	Normal
Author:	Mischa The Evil	Category:	
Created:	2014-09-10	Assignee:	
Updated:	2014-09-10	Due date:	
Remote issue URL:			
Affected version:	3.8.0		
Description:	<p>I was asked by someone last year to port this feature from Redmine to ChiliProject, which I did. I didn't share the result up until now due to a lack of time.</p> <p>Now, before I delete the work I'll upload the patch to this issue to make it publicly available. Yet, I don't know whether or not it might be useful for someone, let alone whether or not it gets integrated in CP-core (considering the rate of activity lately).</p> <p>----</p> <p>*Add environment information display to /admin/info view.*</p> <p># Added @ChiliProject::Info.environment@ (based on Redmine revisions "r9601":http://www.redmine.org/projects/redmine/repository/revisions/9601, "r11918":http://www.redmine.org/projects/redmine/repository/revisions/11918 and "r12003":http://www.redmine.org/projects/redmine/repository/revisions/12003)</p> <p>** Modified during porting:</p> <p>*** changed Redmine strings to match CP strings</p> <p>*** changed Redmine version retrieval calls to CP version retrieval calls (@ChiliProject::VERSION@)</p> <p>*** changed DB-adapter name retrieval call to use CP's DB layer (@ChiliProject::Database@)</p> <p># Added the output of @ChiliProject::Info.environment@ to a new preformatted @div.box@ on the <code>_/admin/info_</code> view and removed the DB-adapter name from the line which outputs @Redmine::Info.versioned_name@ (based on Redmine revision "r9603":http://www.redmine.org/projects/redmine/repository/revisions/9603)</p> <p># Added unit test @ChiliProject::InfoTest@, in <code>_/unit/lib/chili_project/info_test.rb_</code> (based on Redmine revision "r9601":http://www.redmine.org/projects/redmine/repository/revisions/9601)</p> <p>** Modified during porting:</p> <p>*** changed assertion to match CP version string</p> <p>*** added three new assertions to check for the existence of the three "headers" in the new preformatted @div.box@ on the <code>_/admin/info_</code> view</p> <p>Patch created against ChiliProject stable 3.8.0.93de0ba66.</p> <p>----</p>
