

## ChiliProject - Bug # 1369: rdm-mailhandler incompatible with ruby +1.9

<b>Status:</b>	Ready for review	<b>Priority:</b>	Normal
<b>Author:</b>	Max Resnick	<b>Category:</b>	Mail Receiving
<b>Created:</b>	2015-01-21	<b>Assignee:</b>	Max Resnick
<b>Updated:</b>	2015-01-21	<b>Due date:</b>	
<b>Remote issue URL:</b>			
<b>Affected version:</b>	master		
<b>Description:</b>	Recently encounter the following error when upgrading chiliproject to run via ruby 1.9.3:		
	<pre>&lt;pre&gt; /usr/lib/ruby/1.9.3/rubygems/core_ext/kernel_require.rb:55:in `require': cannot load such file -- rdoc/usage (LoadError)   from /usr/lib/ruby/1.9.3/rubygems/core_ext/kernel_require.rb:55:in `require'   from extra/mail_handler/rdm-mailhandler.rb:69:in `<main>' &lt;/pre&gt;</main></pre>		
	Upon further research I discovered that according to the "maintainer": <a href="https://bugs.ruby-lang.org/issues/2713#note-3">https://bugs.ruby-lang.org/issues/2713#note-3</a> @rdoc/usage@ wasn't going to ported for ruby 1.9.3.		
	Seems the best way is to utilize optparse.		

### History

2015-01-21 12:53 am - Max Resnick

- Status changed from Open to Ready for review

- File 1369\_port\_rdm\_mailhandler.patch added

Added a "pull request":<https://github.com/chiliproject/chiliproject/pull/820> on Master branch via github.

Diff is here for anyone trying to to patch their current installations. Patch is against Master branch, I'm guessing that since this probably hasn't been updated in a really long time, there shouldn't be an issue getting the patch to work across multiple versions of Chiliproject.
