<b>Description:</b>	My page should have customizable "My Page Blocks" (as Eric Davis call them ;) displaying issues matching specific filter settings.		
	* It should be possible to be able to add more than one such block		
	* It should be customizable		
	** Amount of displayed issues		
	** All other settings as we have on issue search tab		
	PS This is almost the only thing I missed in Redmine which I had in JIRA

+1 Need ability to customize columns. Without this, my page is a bit useless for many users.
