<b>Description:</b> While working on the CI, I was coming to chiliproject.org and expecting a link to the GitHub page at a prominent place, but always had a hard time finding one.  I guess a link to the source is one of the key use cases for the project home page. Therefore please add add one to the home page or the wiki navigation sidebar.

I've added links to downloading ChiliProject to the wiki sidebar. This should make it easier to find next time.
