

ChiliProject - Bug # 167: Groups don't scale with a high number of members

Status:	Open	Priority:	Normal
Author:	Ben Cooksley	Category:	
Created:	2011-02-09	Assignee:	
Updated:	2011-02-09	Due date:	
Remote issue URL:			
Affected version:			
Description:	With groups containing 2000 users or more, adding the group to a project can take in excess of 3 minutes. After it finishes, loading of the project index page can take 2 minutes as well.		
	I recommend that groups be able to become full members of a project, with just a link shown to the group member list page, which would use pagination appropriately.
