<b>Affected version:</b>			
<b>Description:</b>	commit:8f7da03419071e132bbda1c1983707de15350597 changes and adds a few new css classes for the Gantt chart which will be confusing (css named: task, label). They should be standardized (issue vs task) and not use the @label@ class which can be confusing with the HTML element called label".
