I'd say only mysql or postgres. If you are running Passenger then you will most likely have multiple processes accessing the database and sqlite only really works with 1 process at a time.

- Status changed from Open to In Progress

Just to keep our agreed on process...

2011-02-25 11:19 am - Ian Freeman

First stab at Ubuntu guide: [[Installation_on_Ubuntu_1010]].

I updated the links on the [[Installation]] and [[Installation_on_Debian_Lenny]] pages.

- Status changed from In Progress to Closed

Added extensive guides for Debian Lenny and Squeeze. Ported the Squeeze guide over to Ubuntu. I think these are good for launch.
