ChiliProject - Feature # 198: Manually Manage Changesets

Status:	Duplicate	**Priority:**	Normal
Author:	Alex Bevilacqua	**Category:**	Issue tracking
Created:	2011-02-17	**Assignee:**	
Updated:	2011-02-18	**Due date:**	

Remote issue URL:	http://www.redmine.org/issues/2009
Affected version:	
Description:	As has been discussed at length on the Redmine issue tracker ("issue 2009":http://www.redmine.org/issues/2009), the ability to add related revisions to an issue is missing.
	There have been patches released, but never merged into the core of the project. This is a useful feature that gives administrators and developers a bit more control over the content of issues when working with projects that contain a repository.

History

There is no test in your patch.

So, I can't commit to Redmine.

2011-02-17 10:47 pm - Toshi MARUYAMA

This is incompatible.

2011-02-17 10:49 pm - Toshi MARUYAMA

You should not use "changeset.revision".

- Status changed from Open to Duplicate

Alex, Toshi, I'm really sorry but I had overlooked there was an issue for that already, closing this issue in favor of the other one, please continue any discussion there.
