

ChiliProject - Feature # 199: [PATCH] Adding a hook in the heading on showing an issue

Status:	Closed	Priority:	Normal
Author:	Yuki Sonoda	Category:	Issue tracking
Created:	2011-02-18	Assignee:	Eric Davis
Updated:	2011-03-14	Due date:	
Remote issue URL:	http://www.redmine.org/issues/7647		
Affected version:			
Description:	The heading (h2) in /issue/show is a good place to show something related with the identity of the issue, as http://redmine.ruby-lang.org/issues/show/1 . Could you add an hook point here? I would like to use the hook for the MailingListIntegration plugin which I am developing. I think it is useful for integrating redmine with an external system which posts an issue.

- Assignee set to Eric Davis

I'll take a look at it. I wish there was a better way we could use hooks so that a plugin could change the heading too.

2011-03-14 12:29 am - Eric Davis

- Target version set to 1.2.0

- Status changed from Open to Closed

Thanks Yuki Sonoda. I've added the @:view_issues_show_identifier@ hook in commit:0db26f8.
