Make sure to put a description into the issue here. We don't control redmine.org so if it is offline or goes away we will not understand what this feature request is about.

The issue is about adding markup to add links to comments inside issue links. The note "#391.1 -> <http://www.example.com/issues/show/391#note-1>" says it all.

This has been resolved in Redmine "here":<http://www.redmine.org/issues/2715> so maybe it will be easier to port it to Chiliproject now.
