

ChiliProject - Bug # 235: Interface issues with time logging

Status:	Open	Priority:	Normal
Author:	Daniel Neis	Category:	Time entries
Created:	2011-02-27	Assignee:	
Updated:	2011-03-05	Due date:	
Remote issue URL:			
Affected version:			
Description: I was wondering about several changes in time logging interfaces. Here is a few: * Add the "Date" field to the Issue update screen, in "Log time" fieldset, so we can remove the "Time entries" link and view * Move the "Spent time" view to the ticket details in a sub-section like "Related issues" and "Subtasks" Suggestions are welcome.

I've created a branch to work on this issue at:

<https://github.com/danielneis/chiliproject/tree/235-time.logging>

I've already committed the addition of spent_on field to "Log time" fieldset, but didn't remove the link and view yet.

- *Category changed from User interface to Time entries*

I'm fine with adding the spent_on field to the section on the issue update form.

I don't want to remove the Spent Time or Log Time links or views. Those are used in other places and need to be there (e.g. editing a time entry).

2011-03-03 02:26 pm - Daniel Neis

I was trying to make the block on my-page block editable (<https://github.com/danielneis/chiliproject/tree/my-page-spent.time>) and if there is an editable list in the issue description, we may not need the entire view for editing, just form partials.

Another point, that may be a little off topic, is to add a possibility to create an activity with estimated time and let people log time in that activity, so we can see differences in planned and real time used.

Hello,

here is the commit to add "spent_on" field to the section on the issue update form:

<https://github.com/danielneis/chiliproject/commit/c0241475eb763cc6ec626b36c6e7a2005fc85ddd>

Hope you like

I like the patch, but I am very much opposed to removing the "Spent time" view, we use that functionality extensively (and have extended it a lot). Time reporting is a very broad subject and having a separate view for this is a-good-thing™ IMHO.
