

ChiliProject - Feature # 253: Display TOC in sidebar

Status:	Closed	Priority:	Normal
Author:	Julien Pepy	Category:	Wikis
Created:	2011-03-03	Assignee:	
Updated:	2013-02-02	Due date:	
Remote issue URL:			
Affected version:			
Description: In current version, the space reserved to sidebar is almost wasted (only 3 links to start page, title and date indexes to the wiki). I think it would be great to automatically display the table of contents in this area, so we can use this empty space and gain some place in the displayed page.			

History

2011-03-03 11:12 pm - Eric Davis

Many of my wiki pages have long titles and would overflow the sidebar.

I'm also planning to add a new layout to ChiliProject that will move the project menu to the sidebar (the one with "Overview", "Activity", etc).

2013-02-02 01:13 am - Chris Dähn

- Status changed from Open to Closed

Ack to Eric's statement - TOC better placed freely inside text as macro with default position on the right.

@Felix+Holger: Would like to close this ticket...
