ChiliProject - Feature # 271: Replace checks for "auth_source_id" with "change_password_allowed?" in UsersController

Status:	Closed	**Priority:**	Normal
Author:	Stephan Eckardt	**Category:**	User accounts
Created:	2011-03-10	**Assignee:**	Eric Davis
Updated:	2011-03-24	**Due date:**	

Remote issue URL:	
Affected version:	
Description:	In the UsersController actions changing a user's password and submitting a newly set password via mail is done only when there is no AuthSource associated to the user. The "change_password_allowed?" check in the User model is more appropriate for these kinds of checks and allows custom AuthSources that actually want to set a user's password.

Thanks, I'll review this for you. I wrote the @User#check_password?@ and must have missed UsersController.

2011-03-19 07:55 pm - Felix Schäfer

That seems like something that could go into version#6? ;-)

2011-03-22 11:33 pm - Eric Davis

- Target version set to 1.2.0

2011-03-24 09:24 pm - Eric Davis

- Status changed from Ready for review to Closed

Merged to master. Thank you for the patch.
