Description:	Create a compatibility process showing how to share code with Redmine

History

2010-12-29 04:54 pm - Eric Davis

I think this should include a few things. (Just writing them down so I don't forget them)

* Wrapper classes for @Redmine@. Will handle the bulk of the differences

* Renaming and aliasing code that is called "redmine" (e.g. @requires_redmine_version@ method)

* Process for reviewing Redmine's code and adding it to Bluemine

** Review after each release?

** Security updates

** Bugfixes - both ones fixed in Redmine and ones fixed in Bluemine that need to be sent to Redmine

** Linking of Bluemine issues to Redmine
