

ChiliProject - Feature # 328: Add an option to change issue author on project copy

Status:	Open	Priority:	Normal
Author:	Enderson Maia	Category:	
Created:	2011-04-09	Assignee:	
Updated:	2011-04-09	Due date:	
Remote issue URL:			
Affected version:			
Description: I'm using a project as a template of issues to instantiate new projects using the copy function at Administration. Then I select all issues to be copied, in the new project, the issues' author remains the original. Maybe a better behavior would be to use the user that is doing the copy as the author.
