

ChiliProject - Feature # 331: Set %done with issue state while allowing to change %done manually

Status:	Ready for review	Priority:	Normal
Author:	Harald Frießnegger	Category:	
Created:	2011-04-13	Assignee:	
Updated:	2012-11-28	Due date:	
Remote issue URL:			
Affected version:			
Description: by default, setting the issue state to closed does not set %done to 100%. one can couple %done with the status (can't remember if it was with stock redmine/chili or through a plugin) by telling which state means which percentage. however, this hides the %done field completely so developers can't document how much work is left for a specific issue. it would be good to have a configuration option to optionally associate issue states with a value for %done whilst still having the possibility to change the value manually. eg for most users the state closed also means 100% of the work has been done.			

History

- Target version set to 2.3.0

+1

To rephrase: even if the issue done field is calculated automatically, it should not be hidden. The user should be allowed to change it. That is, the functionality should be as with the "Issue Due Date Plugin":<http://www.redmine.org/projects/redmine/wiki/PluginIssueDueDate>

After updating an issue, the following should be checked:

- * If done% is empty, fill it from the automatic values
- * Else
- ** if issue status has changed, fill done% from the automatic values
- ** if issue status hasn't changed, don't touch done%

2011-09-29 12:28 pm - Harald Frießnegger

sounds good!

2011-10-04 08:32 am - Holger Just

- Target version deleted (2.3.0)

Moving out of the 2.3 target as we don't have any code yet. And I want to release today :)

2012-05-10 01:22 pm - Daniel Nauck

Any news in this topic?

2012-05-13 04:35 pm - Stephan Eberle

I added something similar with this Pull Request:

<https://github.com/chiliproject/chiliproject/pull/192>

Best regards,
Steviee

- Status changed from Open to Ready for review

I added the missing unit tests to Github

2012-11-27 09:48 pm - kwadronaut .

I think Stephans patch is fine, however maybe it should belong in a different bug. To clarify what's being asked:

> After updating an issue, the following should be checked:

>

> If done% is empty, fill it from the automatic values

> Else

> if issue status has changed, fill done% from the automatic values

> if issue status hasn't changed, don't touch done%

What's been written:

> After closing a bug, it sets the done ratio to 100%

2012-11-28 09:05 am - Harald FrieÅnegger

kwadronaut is right. the ticket is about some more configuration and functionality. however, setting done to 100% when a ticket is closed already helps a lot and should find it's way into the next release.

2012-11-28 10:52 am - Stephan Eberle

Fine by me. Should I do something to speed this up?

Travis-CI seems to have a little problem with my tests, tho... Locally run they work for me.
