

## ChiliProject - Bug # 342: Version custom fields are missing shared versions

<b>Status:</b>	Open	<b>Priority:</b>	Normal
<b>Author:</b>	Eric Davis	<b>Category:</b>	Custom Fields
<b>Created:</b>	2011-04-17	<b>Assignee:</b>	
<b>Updated:</b>	2013-08-23	<b>Due date:</b>	
<b>Remote issue URL:</b>			
<b>Affected version:</b>	3.1.0		
<b>Description:</b>	When reviewing commit:d8fbdca76 I noticed that it doesn't look like shared versions are supported in the list. Need to confirm and fix this if they are not listed.		
	File: app/models/custom_field.rb#possible_values_options is scoped to @project@ and only checks the direct association (@project.versions@)		

### History

---

**2011-05-29 06:18 pm - Eric Davis**

- Target version deleted (2.0.0)

- (deleted custom field) set to unstable

Not a 2.0.0-RC blocker

**2012-04-10 01:14 pm - Matthias Scholz**

- Target version set to 3.2.0

This Bug still affects chiliproject version 3.1.

**2012-04-18 11:09 am - Mischa The Evil**

Remote issue URL: <http://www.redmine.org/issues/8615>

**2012-05-14 02:55 pm - Matthias Scholz**

- Status changed from Open to Ready for review

Using the code permitted by the link from Mischa fixes this Bug:

Editing file app\models\custom\_fields.rb:

```
@ 55  when 'version'
56    # CHANGES HERE (versions -> shared versions)
57    obj.project.shared_versions.sort.collect {|u| [u.to_s, u.id.to_s]}
58  end
@
```

Tested on ChiliProject 3.1.0.d61ad0130

**2012-06-05 03:47 pm - Felix Schäfer**

Could someone have a look at the Redmine code and make a pull request out of it? Thanks.

**2012-06-05 03:47 pm - Felix Schäfer**

- Status changed from Ready for review to Open

- Assignee deleted (Eric Davis)

**2012-06-09 05:43 pm - Holger Just**

- Target version deleted (3.2.0)

- Affected version changed from unstable to 3.1.0

Pulling this out of version:3.2.0 as it was not ready on release day.

**2013-07-08 01:54 pm - Daniel F.**

- Target version set to 3.9.0

This bug also affects Version 3.8, see #1280 for further information and a suggested bugfix.

Could you please try to include a patch for 3.9?

I would suggest changing line 57 to

```
@ obj.project.shared_versions.sort.collect {|u| [u.project.identifier + ':' + u.to_s, u.id.to_s]}
```

```
@
```

```

That is basically implementing what I describe in remote issue URL <http://www.redmine.org/issues/9850>. Though, you use:

```
<pre>obj.project.shared_versions.sort.collect {|u| [u.project.identifier + ':' + u.to_s, u.id.to_s]}</pre> while in http://www.redmine.org/issues/9850#note-7
```

```
I used: <pre>obj.project.shared_versions.sort.collect {|u| ["#{u.project.to_s} - #{u.to_s}", u.id.to_s]}</pre>
```

So, besides the differences in syntax, we differ in what should be prepended to the version name:

[You]"@{project identifier}: @" before the "@{version name}@"

[Me]"@{project name} - @" before the "@{version name}@"

I think it is better to use the project name here instead of the project identifier (which makes the use of a space followed by a dash and a following space more clearly instead of a colon followed by a space) but YMMV ;)
