Hello,

is this Feature still in progress or at least planned? redmine.org holds this feature issue for more than a year without realizing it. I consider switching to chiliproject if useful requests like this one are recognized and realized quicker than redmine does.

regards
Matthias

It looks like I don't have permission to add the Remote Issue URL, so could someone either add http://www.redmine.org/issues/6118, or give me permission to do it myself? Thanks.
