

ChiliProject - Task # 421: review tasks in REST API category on Redmine.org

Status:	Open	Priority:	Normal
Author:	Alexey Java	Category:	REST API
Created:	2011-05-20	Assignee:	
Updated:	2011-06-04	Due date:	
Remote issue URL:			
Description: - and implement them all! :) There are many minor things still not implemented in Redmine's REST API, which makes it usage somewhat inconvenient.			

History

Good idea but see <https://www.chiliproject.org/boards/2/topics/67> (tl;dr: rewrite REST api)

2011-05-20 06:04 pm - Alexey Java

refactoring is a good thing, but maybe we could add some important features to the existing API first...

2011-05-20 06:19 pm - Eric Davis

It's not a refactoring, it's a *rewrite*.

2011-05-20 06:27 pm - Alexey Java

it looks to me that Chiliproject development is not going very fast, which makes me worry that a complete rewrite for the REST API would take a loooooong time, while people need some particular REST API features today...

I disagree. The unstable (2.0) branch is under a lot of development and we have been merging in a lot of developer branches recently where most work happens.

I'm planning to do it in June ([[Edavis10]]). If you'd like to speed it up, I'd appreciate the help.

I don't know Ruby, plus I'm swamped with Task Adapter and Redmine Java API projects (in addition to my day job!)... :)

I submitted a new request about REST API: <https://www.chiliproject.org/issues/448>

Hopefully this can be implemented in the new version.
