

ChiliProject - Bug # 423: Remove explicit render from WikiController#show

Status:	Closed	Priority:	Normal
Author:	Tom Kersten	Category:	Refactoring
Created:	2011-05-20	Assignee:	Eric Davis
Updated:	2011-05-27	Due date:	
Remote issue URL:			
Affected version:	unstable		
Description:	Removing the explicit @render :action => 'show'@ in WikiController#show will not effect existing functionality but will allow sub-classes of the controller to handle various render formats using a respond_to block. An example of what this will allow is for a gem to add support for additional formats (such as PDF) for a wiki page without affecting existing routes.		
	I have made a pull request with the changes "here": https://github.com/chiliproject/chiliproject/pull/62		

Associated revisions

2008-03-11 08:33 pm - Jean-Philippe Lang

Activity enhancements:

- * overall activity view and feed added, link is available on the project list (#423, #494)
- * switch added on the project activity view to include subprojects (closes #530)

[#423] Removed explicit render in WikiController#show

- * Allows for format extensions in plugins w/o giving a double-render error
- * Updated Wiki#show template to specify 'wiki/sidebar' explicitly (vs. just 'sidebar')

History

2011-05-27 03:09 pm - Eric Davis

- Status changed from Open to Needs more information

Tom:

Is this ready? I heard you and Holger chatting about it and wasn't sure if this is the final result.

2011-05-27 03:13 pm - Tom Kersten

Eric:

As far as I know, it is ready to go. I have applied the patch locally and in our production site with no impact. I believe the only task remaining was to create this ticket so any necessary future discussions could use it as a reference.

2011-05-27 05:06 pm - Eric Davis

- Target version set to 2.0.0

- Category set to Refactoring

- Status changed from Needs more information to Ready for review

Thanks. We might be able to include it into 2.0.0.

Only thing I saw was that if you prefix the commit log with an issue, it helps us associate the commit to the issue. I added some examples to [\[\[Git Standards\]\]](#).

Added to unstable in commit:ce8bb652c6e7. Thanks for the patch and let us know if you come across any other refactorings.

Got it. Will do...and thanks for merging it in!
