I'm the author of the original patch. There were a few things I wanted to improve with it, but I think we could add it to ChiliProject and improve them as we go. I've heard a lot of people asking for this feature.

I'll see about rebasing the patch into a pull request (was from 2009-12-29!)

It would be great! Many thanks, Eric.

I'd like to add my support to this request.

+1 this would be useful for sure.

+1 We need this also for our issue validation process. i.e. A group of members have the authority to validate issues before they can be eligible for further investigation and resolution of the issue

+1 here ... this would be ideal for dispatching groups
