

ChiliProject - Feature # 428: integrate with gerrit

Status:	Open	Priority:	Normal
Author:	Larry Cai	Category:	
Created:	2011-05-27	Assignee:	
Updated:	2011-06-02	Due date:	
Remote issue URL:			
Affected version:			
Description: In enterprise, gerrit is the popular git repo management tool, it is possible to integrate with gerrit			
* repository replication http://gerrit.googlecode.com/svn/documentation/2.1.7/config-replication.html , so we can avoid to run cron job to clone the repo, from user point of view, I just fill the gerrit server url			
* code review is nice feature in gerrit, I don't which could be best to have redmine with gerrit, but it is possible to have nice thing there			

History

We also use Gerrit and I'd welcome a Gerrit<->ChilliProject connection. Nevertheless (to be honest), I see more critical things to work on.
