ChiliProject - Feature # 435: Deprecate the catch-all route

Status:	Open	**Priority:**	Normal
Author:	Felix Schäfer	**Category:**	Refactoring
Created:	2011-05-29	**Assignee:**	
Updated:	2011-05-29	**Due date:**	
Remote issue URL:			
Affected version:	master		
Description:	I think we've talked about deprecating the catch-all route already, but before removing it we should deprecate it. I'm not sure how that should be communicated, but I'd like to deprecate it in 2.0 and throw it out in 3.0 at the latest.

- Target version deleted (2.0.0)

I'd like to deprecate this in the 2.x series but I don't want to block 2.0.0 with it. The deprecation warning could just be a forum message and wiki page.

(I'm thinking that each major deprecation should have a wiki page. That way we can point someone to a specific page that shows when it was deprecated, when it was (will be) removed, and how to upgrade.)
