# ChiliProject - Bug # 472: Associated revisions styles have incorrect spacing for lists

| | | | |
|---|---|---|---|
| **Status:** | Open | **Priority:** | Normal |
| **Author:** | Tom Kersten | **Category:** | User interface |
| **Created:** | 2011-06-13 | **Assignee:** | |
| **Updated:** | 2012-12-07 | **Due date:** | |
| **Remote issue URL:** | | | |
| **Affected version:** | | | |
| **Description:** | If you use textile markup in your commit messages, the li-bullets are rendered outside of the "Associated Revisions" area (see attached file). Patch forthcoming... | | |

## History

**2011-06-13 09:44 pm - Tom Kersten**

*- File after.png added*

Submitted a pull request to resolve this. It's a tiny changeset (one line change) and the details are outlined in detail on the pull request ("here":https://github.com/chiliproject/chiliproject/pull/75). See the attached image for a view of what effect it has on the styling of the site.

Let me know what you think...

**2011-06-22 08:08 pm - Felix Schäfer**

*- Category set to User interface*

*- Status changed from Open to Declined*

Closing this as this has already been applied in a similar form in commit:844c0d97aad079806577a348aef4898daf9c5b50, also see "Pull Request 75":https://github.com/chiliproject/chiliproject/pull/75 for a little more discussion.

**2012-12-07 11:07 am - Axel Böswetter**

*- File _revisions.rhtml.patch added*

*- Status changed from Declined to Open*

Sorry, that I have to reopen this old issue, but the incorrect styling still appears in the comments section of the repository revision list. The comments table cell should get the @wiki@ css class too, so that textile formated commit messages will be rendered correctly there as well.

See attached patch (diff from v3.3.0). Thanks.
