<b>Affected version:</b>	unstable		
<b>Description:</b>	Reported by Jan F Westerkamp in the "forum": <a href="https://www.chiliproject.org/boards/1/topics/485">https://www.chiliproject.org/boards/1/topics/485</a>  > after upgrading Redmine 1.1.0 (with a few svn repositories) to ChiliProject 1.4.0 and applying the fix from #466 almost everything looks perfect. > There is only one thing that stops me from updating my servers at the university: going to a project and opening the activities folder I'm shown the activities of all my projects. > > To update the activities I use a cron job with > rake -f /opt/chiliproject/Rakefile redmine:fetch_changesets RAILS_ENV=production > > Updating changesets automatically doesn't work either. > > Is this worth opening a ticket or have I missed the solution somewhere in the redmine/chiliproject documentation?		

### History

#### 2011-06-17 09:41 pm - Eric Davis

- Target version deleted (2.0.0)

- Assignee deleted (Eric Davis)

- (deleted custom field) set to unstable

- Status changed from Open to Needs more information

I can't reproduce in the latest release-v2.0.0 (9f2c412).

# Add repo to ProjectA

# Add repo to ProjectB

# Check Activity to make sure Changesets are separated by activity

#### 2011-07-08 09:58 pm - Felix Schäfer

Asked Jan for more information, can be closed in a week or so if we don't have an answer until then.

#### 2011-07-11 07:00 pm - Jan F Westerkamp

- Status changed from Needs more information to Closed

Lacking time I did something similar with my existing database. This time I upgraded from redmine 1.2.0 to chiliproject 2.0.0 and it looks fine so far. (I still have to install my plugins and themes.)

Therefore, this issue is closed, since I can't reproduce it myself.

**2011-07-11 08:21 pm - Jan F Westerkamp**

should have done this earlier:

The plugin "readmine\_arch\_decisions":[https://github.com/bigokro/redmine\\_arch\\_decisions](https://github.com/bigokro/redmine_arch_decisions) (at least now) seems to be problem. All `_activity_` pages result in an error if I install it.

But I won't open a ticket, even though I really like and need that plugin for one of my servers.

I don't have the time for any testing at the moment.

Thanks for reporting anyway. Mind adding it and especially the version of the plugin you have tested it with to `[[Plugin Compatibility]]`?
