

ChiliProject - Bug # 500: short operator api filters c and o

Status:	Open	Priority:	Normal
Author:	Chris Woerle	Category:	Issue tracking
Created:	2011-06-30	Assignee:	Chris Woerle
Updated:	2011-07-11	Due date:	
Remote issue URL:			
Affected version: master			
Description: an api call with issues.xml?my_field=cstartingvalue will be filtered <pre><pre> @@operators = { "=" => :label_equals, "!=" => :label_not_equals, "o" => :label_open_issues, "c" => :label_closed_issues, "!=" => :label_none, "*" => :label_all, ">=" => :label_greater_or_equal, "<=" => :label_less_or_equal, "<t+" => :label_in_less_than, ">t+" => :label_in_more_than, "t+" => :label_in, "t" => :label_today, "w" => :label_this_week, ">t-" => :label_less_than_ago, "<t-" => :label_more_than_ago, "t-" => :label_ago, "~" => :label_contains, "!~" => :label_not_contains } </pre> <pre><pre> def add_short_filter(field, expression) return unless expression parms = expression.scan(/^(c o ! * ! *)?(.*)\$/).first add_filter field, (parms[0] "=", [parms[1] ""]) end </pre> h3. possible solutions: * use c= and o= instead. * add = parameter to the list (will work) and tell everybody to use my_fields==cstartingvalue</pre></pre>

- Status changed from Open to Ready for review

I did this as redmine plugin (sorry) :

https://github.com/suung/redmine_short_operators_fix

Should be working, but you may find some issues.

Chris, I guess I like the @c=@/@o=@ solution better because it doesn't change the API, whereas forcing everyone to use @==@ would only be doable in a major ChiliProject release. Could you make a pull request with the updated filter and a few tests?

2011-07-11 08:01 pm - Chris Woerle

Felix, yes, I will do this soon.

Currently I don't have a clean chiliproject base and this will cost me a minute.
