

ChiliProject - Bug # 502: Inline images are not appearing in initial notification email

Status:	Open	Priority:	Normal
Author:	Gilbert Flamino	Category:	Mail Sending
Created:	2011-07-01	Assignee:	
Updated:	2011-07-01	Due date:	
Remote issue URL:			
Affected version:			
Description: Creating an issue with an attachment that is included as an inline image (e.g. !sample.gif!) results in an initial email notification that includes a invalid image. <pre><pre> <p></p> </pre></pre> Emails generated by updates to the issue result in the same inline image reference working. <pre><pre> <p></p> </pre></pre> The image below will probably not appear in the initial email. !image.gif! ----- ChiliProject 1.4.0 MySQL 5.1
