History

2011-07-31 11:38 am - Tom Rochette

Which database layer are you using? (sqlite, mysql, mysql2, postgre, ...)

AFAIK, 1.9.2 is known for still not playing nice with mysql encoding.

2011-08-01 11:32 am - Craig Price

Not sure about the original poster, but I also seem to be experiencing this bug. In my case, I'm using mysql on 1.9.2.

2011-08-02 11:40 am - Craig Price

I have just updated to version 2.1.0, and this bug is still present in my system.

2011-08-05 03:46 pm - Eric Davis

- *Priority changed from High to Normal*

In your database.yml are you using mysql or mysql2? If it's mysql, try using mysql2.

2011-08-06 02:52 pm - Craig Price

I was using mysql. I switched to mysql2 in database.yml, but with no effect whatsoever.

I thought maybe my database was already borked, so I dropped all tables and re-ran the various rake commands to re-setup and populate the database. This also seemed to have no effect- I still get the exact same error.

Did I perhaps miss something?

2011-10-31 10:23 pm - Holger Just

- *Status changed from Open to Needs more information*

Could you please check if the issue still persists with ChiliProject 2.4?

2012-01-03 10:31 pm - Holger Just

- *Status changed from Needs more information to Closed*

Closed as of inactivity. As we have tremendously improved 1.9 compatibility since version:2.0.0, I assume this to not be an issue anymore.
