I also registered chiliproject.de. Please let me know when I can start the transfer.

Schlundtech (or more specifically their upstream registrars) only allow to PRE-ACK gTLD domains (com, net, org) after 60 days of registration. So I'm going to transfer these after that time (i.e. in early march). I will take good care of them until then. I don't expect any issues during the actual transfer because neither the IPs nor most of the actual DNS servers are going to change during that process.

I accept other domains for transfer though :) If the transfer is just between Schlundtech accounts it's going to be free.

Holger: should we push this issue back to after the launch and just move along with other launch tasks?
