ChiliProject - Feature # 579: Hiding userlist in configuration -> Member -> New member

Status:	Open	**Priority:**	Normal
Author:	Denny Schierz	**Category:**	Themes
Created:	2011-08-16	**Assignee:**	Denny Schierz
Updated:	2011-08-21	**Due date:**	

Remote issue URL:	
Affected version:	
Description:	It would be usefull to hide the userlist and add the user only over the search field. I know, I can manipulate the theme, but this makes update/upgrades complicated.

Hi Denny,

I am not 100% sure whether this is exactly what you need. At finnlabs we implemented a plugin for one of our clients that mitght help you. Currently this plugin is not released yet. Hopefully we get the permission next week from our client.

Here are the specs for the plugin:

* If you have more than 20 users in your CP-installation you don't see the userlist

* The user search field has autocompletion.

Does this help you?

Regards
Niels
